# POSITION OPENING

---

---

## Electrical Engineer Eta Engineers

---

Eta Engineers, a division of the Devonshire Group, is a growing engineering firm seeking a licensed Electrical Engineer. This position is based in Champaign, IL.

The job primary responsibilities include:

- Manage electrical components of building projects from conception to completion for clients, including building owners, architects, contractors, and other engineering consulting firms;
- Build and sustain client relationships and drive and grow market share while maintaining a pipeline of work;
- Prepare proposals, budgets, estimates, contracts, and change orders for MEP projects;
- Prepare and review MEP documents, including drawings and specifications, which comply with federal and state regulations and provide interpretations for clients;
- Create concepts and designs in response to client requests and oversee and coordinate work of other designers and drafters to meet appropriate deadlines; Monitor projects to ensure work is progressing in-line with client requirements;
- Make recommendations to, and monitor standards associated with electrical engineering; ensure high quality work is being performed at all times; thoroughly review work of other designers and drafters prior to submitting documents to clients/municipalities;
- Promote and maintain a collaborative work environment between architects, other engineers, other divisions of the Devonshire Group, vendors, and clients.

Qualifications/Experience required include:

- Bachelor's Degree in Electrical Engineering;
- Professional Engineer License in the State of Illinois required, licensure in other states, including Indiana, preferred;
- 7-10 years work experience and experience in a MEP design or consulting environment a plus;
- LEED Certification or the desire for certification preferred;
- Proficient in AutoCad MEP and/or Revit; other current industry software as well as Microsoft Office;
- Highly self-motivated, self-directed, team orientated, and exceptionally attentive to detail;
- Excellent written, oral and interpersonal communication skills; ability to discuss or explain design features or issues with engineers, architects and other drafters and designers;
- Ability to identify issues dealing with conflicting designs, unsuitability of conventional materials, coordination requirements, etc.
- Ability to effectively prioritize workload and execute tasks in a fast paced environment;
- Flexibility to work extended hours and travel, as business requires.

If interested in this opportunity, please submit a resume and salary requirements to:
